

## SecPro Fix: Updating the Race Manager directly via the Data Table

**Fault:** Race Manager will not open  
**Cause:** Race Manager looks at the current system data and determines that there are no races loaded for the current Calendar Year  
**Fix:** Add a Race for the current year directly into the relevant data table

**Process:** Main Menu > Maintenance > Accessing Data Tables > Race Register

**Race Register data table opens up, click the New (Blank) Record icon**
