

# iPigeon

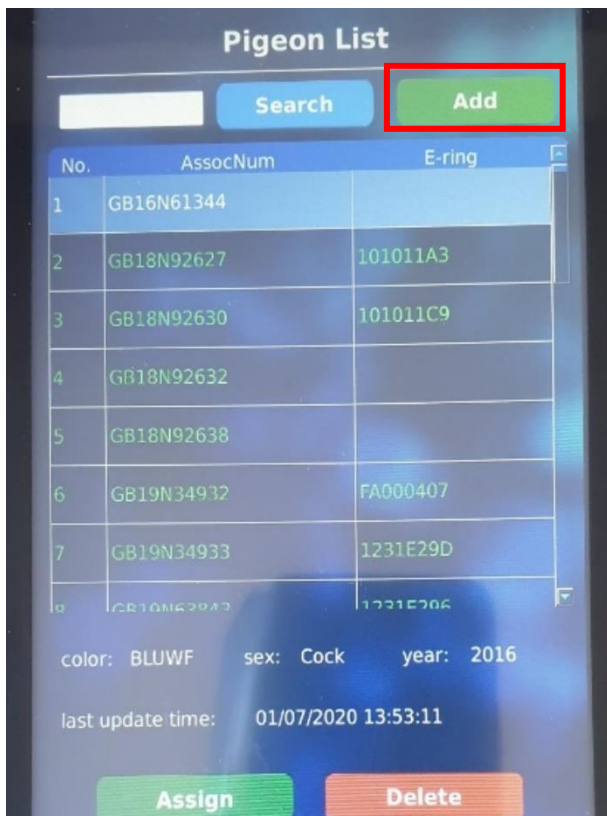

## Adding a Pigeon and Assigning a Ring to it ready for Training and Racing

*This 'manual' method is great for adding the odd pigeon, or entering what you consider to be a manageable number of pigeons. In all other instances we do recommend using the CLUB MANAGER software, that can easily be installed onto a Windows computer, to assist you in adding all pigeons to your iPigeon. The club manager allows copy/paste functionality and another feature allows a sequential series of ring numbers to be added very quickly e.g. 40 new rings issued to you by your club. Whether you use this method, or the club manager, steps 6-9 (below) is the best method of assigning your own rings.*

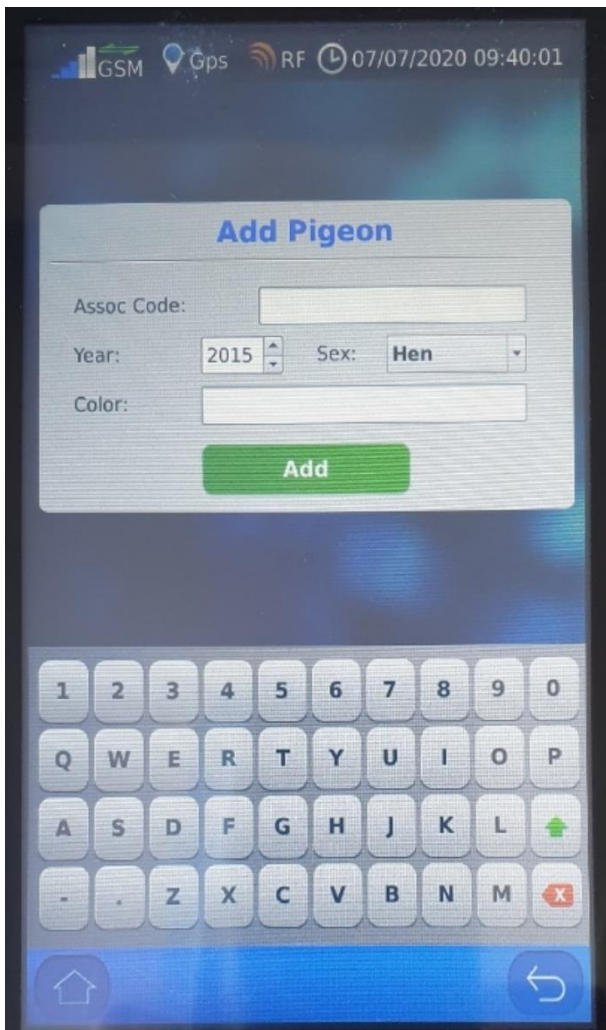

1. From the HOME screen, press PIGEON MANAGER

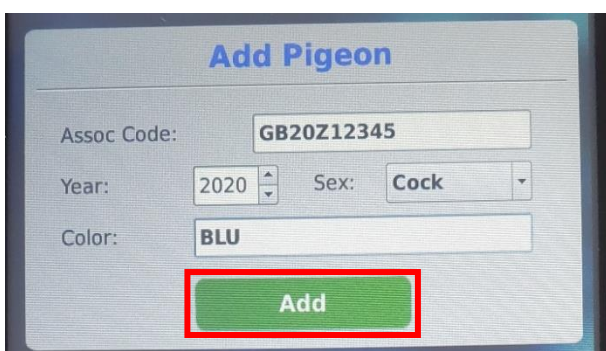

2. Press ADD

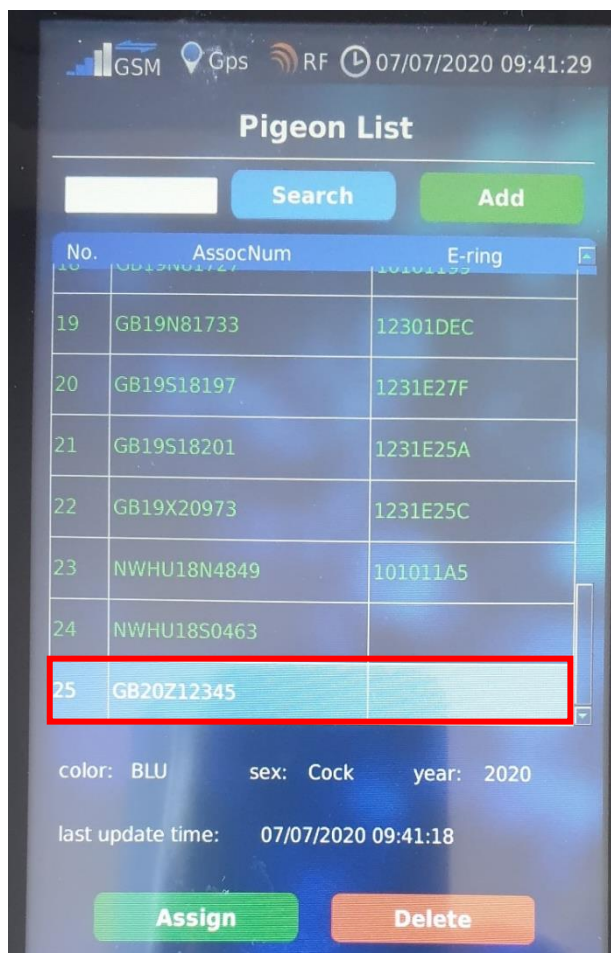

3. **Add Pigeon** screen appears. In this example we are going to add ring number **GB2020Z12345 Blue Cock**. A 'virtual qwerty keyboard' appears to assist you

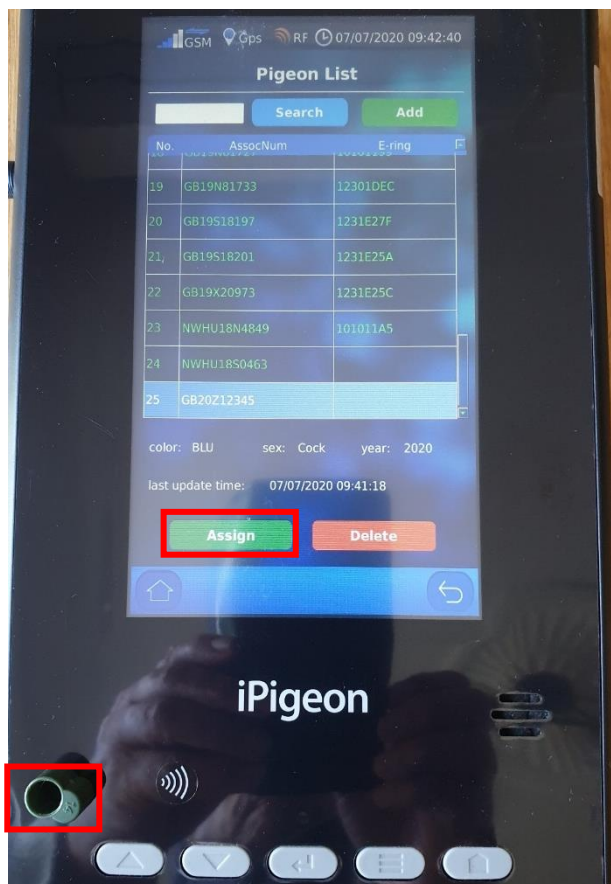

4. Type in the full Ring Number, select the Year, select the Sex, and type the Color (must correspond to a colour in the permitted list, see Appendix e.g. BLU = Blue; BLUCH = Blue Chequer, etc). Click ADD once completed.

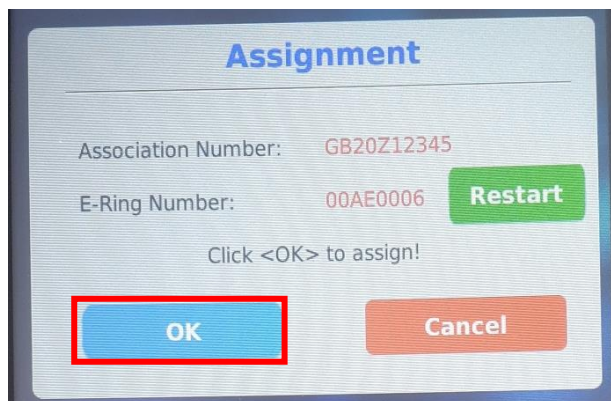

5. The new pigeon is appended to bottom of list and is currently UNAssigned (no E-ring code).

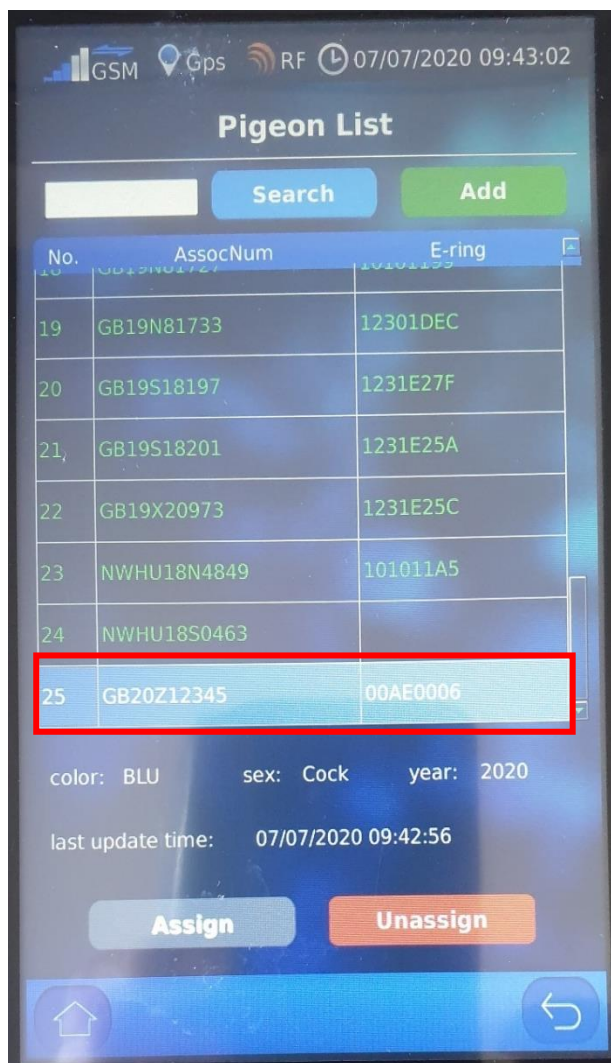

6. To assign a ring to this pigeon, place Chipping in bottom-left corner of iPigeon and press ASSIGN

7. Pop-up message will appear, press OK to complete the Ring Assignment to this pigeon. Press RESTART or CANCEL if this assignment is incorrect.

8. Pigeon List is updated and **the e-ring code** will appear against this pigeon

9. To UNAssign a ring for this or any other pigeon, navigate to that pigeon and press the red UNASSIGN button.

## Appendix

### Permitted Colours:-

Code	Description
BARLS	Barless
BCPWF	Blue Chequer Pied WF
BLCHP	Blue Chequer Pied
BLK	Black
BLKP	Black Pied
BLKPW	Black Pied WF
