

# Installing the TOPIGEON Club Software

If your club has two or more members using the iPigeon ETS system it makes good sense to install the TOPIGEON Club Software onto the Club's Computer ... among many benefits to be gained are

- the creation of a single race program that can then be synchronised to each Timer used in the Club
- the ability to change Member Details as required e.g. if Name changes from M/M Jones to Jones Bros
- re-initialise a Timer if one club member sells his Timer to another club member

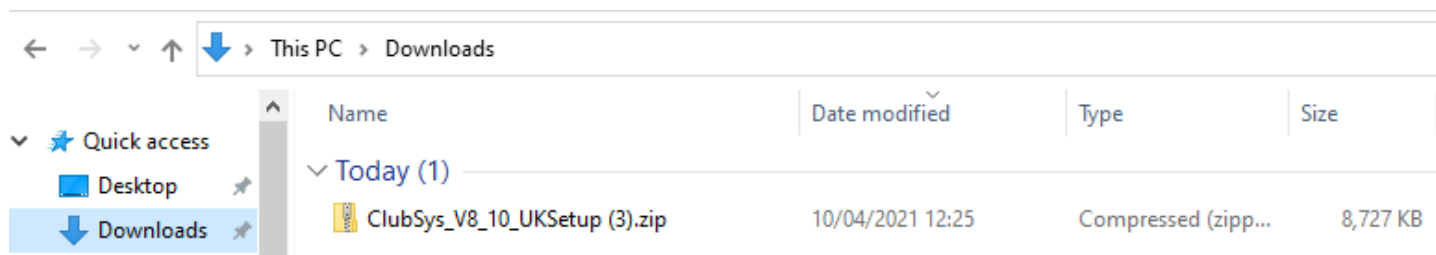

Installation process:-

1. Click this link to access the downloads page <https://www.pbosolutions.co.uk/ipigeon/> then click the **Download** button on that screen

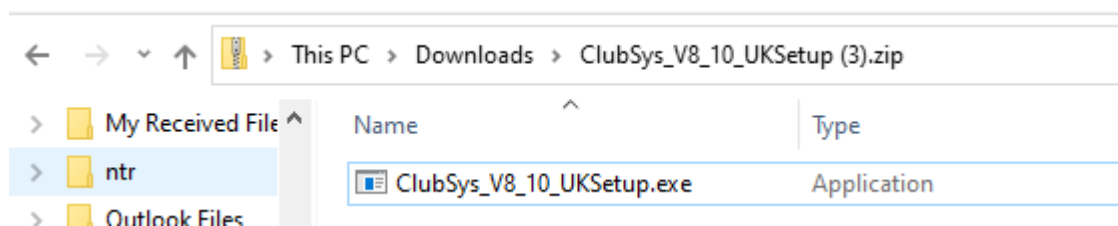

*... Club Activities, Club Manager*

[Club Manager software to install onto Club's computer \(ZIP file\)](#) **Download**

2. This will save a ZIP file into your **Downloads** folder on your computer, as below

3. Double-click that ZIP file to expose the **exe** file stored within it

4. Double-click the **\*Setup.exe** file
5. Installation will commence and within a few clicks will complete
