## how to generate a 'Strike Report' at Basketing

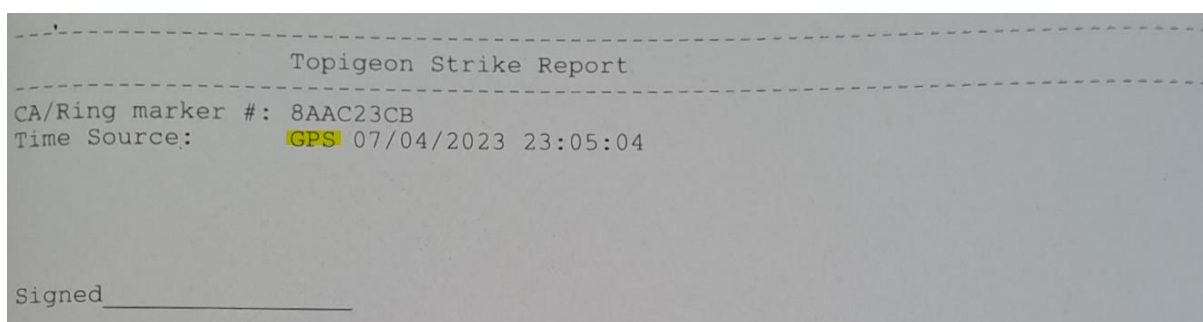

If your Union requires your club to produce a 'Strike Report' to evidence that GPS has been gained by the Ring Marker, here's how to generate it

Please follow this procedure at EVERY basketing session, and also at EVERY strike-off session

1. Power up the Ring Marker
  - making sure that the GPS Antenna attachment is plugged into the "GPS" socket
2. WAIT for the flashing blue light to settle into a solid blue light
  - This could take 5-10 minutes
3. Connect the first iPigeon Timer to the Ring Marker using the special mini-DIN cable
  - This timer **MUST** have Firmware version v8.9.37, or higher
4. From the MENU that appears on the Timer, select CLUB MANAGER, whereupon the following options appear

5. Select/press STRIKE REPORT
6. After you click STRIKE REPORT, the print is sent to the Printer 'queue' but to release it from the 'queue' you'll need to then **push the OK/GO button** (different Printers may have different print queue release buttons)
7. IF you forget to release the Strike Report from the 'queue' you'll find that it prints at the top of the first Basketing List sheet that's produced ... simply cut it of the top
8. The basketing team official must SIGN the report

9. The Strike Report must be retained with the Basketing Lists
